12. A, B, C
13. B

A	B
Marsh	A grassland with waterlogged soil near the surface but without standing water most of the year.
Bog	A frequently or continually inundated wetland dominated by emergent herbaceous vegetation – may be tidal, non-tidal, fresh or saline.
Wet Meadow	Shallow, ephemeral marsh-like depression carved out by glaciers, found in the northern U.S. and Canada.
Swamp	A peat accumulating wetland with no significant inflows or outflows. Many support primary Sphagnum
Pothole	Lowlands found along streams and rivers that are periodically flooded.
Bottomland	A wetland dominated by trees and shrubs.
